SUMMARY

Frontend Engineer with **10+ years** of experience in software development and **6+ years** in Vue, React and TypeScript.

Expert in building robust client-side architecture, integrating complex APIs, and designing intuitive UI/UX. Proven track record in B2B/B2C SaaS, delivering high-performance dashboards, analytics platforms, and complex data visualizations that scale seamlessly with growing data volume.

Passionate about clean code, functional design, and elegant user interfaces.

CURRENT FOCUS

- AI tools in development and testing
- LLM integration in user interfaces
- Product thinking

CORE STRENGTHS

CONTEXT RETENTION

Successfully maintain multiple large-scale projects over the long term; navigate the stack, legacy code, and business solutions; provide accurate estimations.

ARCHITECTURAL SOUNDNESS

I choose solutions that pay off in the long run: strict typing, decomposition, avoiding rushed compromises, which reduces debugging time and simplifies maintenance.

QA MINDSET

I don't just write markup - I build UI with the expectation of how it will break. Systematic approach to edge cases and visual consistency reduces bug count in UAT by a noticeable margin.

AI TOOLING

Not just a Copilot subscription, but my own toolkit: plugins for Claude Code, MCP servers, integration with the corporate stack. I treat it as a tool - AI should augment the engineer, not replace them.

QUICK ADAPTABILITY

I regularly learn and adopt modern tools and apply them in production projects right after mastering them, increasing productivity.

TOP SKILLS

- Vue / Nuxt
 - React / Next
 - Front End Engineering Design (FEED)
- Typescript / Javascript
 - AI Development: LLM, MCP, Automations
 - User Experience Design (UED)

TECHNOLOGIES

- Frontend:** Vue, Nuxt, React, Preact, Next, TypeScript, JavaScript, HTML, SCSS/SASS
- Architecture:** SPA, SSR, REST, WebSocket, Pinia, Redux, Zustand, Vue Router, React Router
- AI & LLM:** Claude, OpenCode, OpenRouter, OpenWeb UI, LibreChat, LM Studio, Python for AI scripts
- Styling & Design:** Tailwind, Bootstrap 5, NaiveUI, Metronic, Vuexy, shadcn/ui, Figma
- Build & Infrastructure:** Vite, Webpack, npm, Git, CI/CD, Railway, GitHub Pages. Docker (with AI)
- Testing & Debugging:** Sentry, UX testing, Vue/React/Chrome Devtools
- Tools:** VS Codium, Swagger, Postman, GitLens, ESLint, Prettier, MCP servers
- Additional:** YouTrack, TMetric, Photoshop, Drawio, Miro, Redmine, Tortoise SVN

EXPERIENCE

- 08/2018 – Present

Chişinău

Senior Frontend Engineer

Yucatech.Software

 - Built full-cycle frontend solutions on Vue/Nuxt/React for AI products, fintech platforms, and infrastructure admin panels: from prototype to production
 - Conducted UX/UI audits and redesigns, implemented custom design systems, including migrating legacy projects from WordPress to a modern stack
 - Grew from a Junior Web Developer to a Senior Frontend Engineer, driving technical decisions and product evolution
- 06/2024 – 2026

Chişinău, Moldova

Senior Frontend Engineer

turrior

 - Developed an AI candidate screening system (resume and response analysis), reducing initial selection time and improving assessment accuracy
 - Integrated an AI assistant powered by WebSocket and MCP servers into the personal dashboard, enabling instant consultations without switching between services
 - Built a chat module for HR-candidate communication, centralizing all correspondence within a single platform

- Implemented asynchronous video interview functionality, allowing candidates to complete interviews at their convenience

08/2022 – 11/2024
Chişinău, Moldova

Senior Frontend Engineer

Hexallion

- Built and maintained a comprehensive admin panel for managing VPN servers, providing centralized control over infrastructure and pricing
- Closely collaborated with the backend development team, enabling aligned API design and faster integration

09/2022 – 07/2024
Chişinău, Moldova

Middle Frontend Developer

LYCASTESWISS

- Developed a facial skin health assessment system based on AI analysis and questionnaires, automating initial diagnostics
- Created a beauty profile dashboard with result visualization and planning of cosmetic procedure packages
- Built an AI assistant chat for user consultations on skin health, increasing engagement

02/2022 – 09/2023
Chişinău, Moldova

Middle Frontend Developer

Settle Global Solutions Ltd

- Developed a real-time dashboard for tracking smart contracts and blockchain settlements, including balances, transactions, and a reporting system
- Collaborated with the design team on a UX/UI audit and significantly improved visual authenticity and UX (migrated from WordPress to Vue with a custom UI kit)
- Worked closely with a backend engineer to improve API contracts: streamlined documentation and typing, migrated away from legacy REST, and prepared the system for a technical audit

04/2021 – 08/2022
Chişinău, Moldova

Middle Frontend Developer

PairsTrade

- Developed a trading operations screening and financial portfolio management platform with an intuitive interface for market analysis
- Integrated the system with a Telegram bot, enabling access to market data and notifications via messenger
- Visualized historical trading pair data through detailed line and bar charts

08/2020 – 08/2022
Chişinău, Moldova

Junior Frontend Developer

Arbinox

- Developed an automated arbitrage platform integrated with the Arbibot trading bot, ensuring seamless frontend-backend integration
- Visualized complex statistical data through tables, charts, and diagrams updating in real time via WebSocket
- Conducted a thorough UX/UI audit and implemented improvements across all project areas, enhancing interface usability

06/2018 – 03/2020
Chişinău, Moldova

Web Developer

HOSTRY

- Developed and maintained a large-scale internet services portal, ensuring stable performance and up-to-date content
- Closely collaborated with the design team, maintaining consistent styling and strengthening the product's brand identity

05/2017 – 07/2018
Chişinău, Moldova

Thermal Engineer

Termoexpert

- I worked as a Design Engineer for residential building utility systems - including heating, electrical, and ventilation systems
- Part of my professional work involved creating and maintaining the company's website - I convinced management to switch from an outdated CMS to WordPress, thereby improving the quality of services and sales conversion

2012 – 04/2017
Chişinău, Moldova

Web Developer

Self Employed (Web Developer)

- As a student, for 5 years I pursued web development as a hobby and for self improvement, creating and maintaining several projects on uCoz: fan sites, forums, and personal pages
- A portfolio with my early projects:

EDUCATION

09/2011 – 07/2015

Bachelor's degree, Heating, Ventilation, Engineering Technology / Technician

Technical University of Moldova

09/1999 – 07/2011

High School

Liceul teoretic "Academicianului Constantin Sibirski"

09/1996 – 06/1999

Elementary School

Liceul Teoretic "Titu Maiorescu"
